GO KART · SKU 964-FSR

964 Full-Size Electric Roadster

A full-size, open-cockpit electric roadster with classic 964-style lines: 2.6 m long, 1500 W or 2500 W mid motor, up to 70 km/h, seats adults from 1.4 to 2.0 m.

LENGTH	TOP SPEED	RANGE	DRIVER HEIGHT
2.6 m full size	**Up to 50 / 70 km/h***	**Up to 40 / 100 km***	**1.4–2.0 m**

The **964 Full-Size Electric Roadster** takes the open-top classic look of our 964 family and builds it at full size. It is **2.6 metres long**, carries up to **300 kg**, and fits drivers from **1.4 to 2.0 metres** tall. It has round headlamps, a low windscreen, wide rear arches and an open cockpit, and from a few metres away most people assume it is a restored classic sports car. Then it pulls away silently on electric power.

Standard suits venues, resorts and families. It pairs a **60V 20Ah battery** with a **1500 W mid-mounted motor** for up to **50 km/h** and up to **40 km** of range.

Performance is for owners who want more. It has a **72V 50Ah automotive-grade battery** and a **2500 W mid-mounted motor** for up to **70 km/h** and up to **100 km** of range. It also adds **four-wheel disc brakes** with a **hydraulic handbrake**, **fast charging** and a **Nappa houndstooth interior**.

Key features

Full-size, not kart-size. At 2.6 metres long it has the presence of a real classic roadster, so it fills a showroom floor or a resort driveway the way a full car does.

Two power levels. Standard (60V, 1500 W, up to 50 km/h) for venues and families, or Performance (72V, 2500 W, up to 70 km/h, up to 100 km range) for owners who want more.

Real suspension. Double-wishbone suspension with adjustable coilovers gives a composed ride and handling that feels like a car, not a toy.

Three speed modes. High, medium and child modes let one car serve experienced drivers, beginners and younger family members.

Quick-swap battery. Swap a charged pack in and keep driving, which matters for rental and event use.

Built to your spec. Paint, interior colour, stripes, numbers and decals are confirmed with you before production starts.

Specifications

DIMENSIONS & CAPACITY	
Length × width × height	2.6 × 1.1 × 0.8 m
Vehicle weight	190 kg
Payload	300 kg

Applications

Private collections · Resorts and hotels · Exhibitions and showrooms · Controlled driving experiences · Brand activations

Standard colours: Signal Yellow, Blush Pink

Specifications may change between production batches; the quotation and spec sheet issued with your order take precedence. Flight times and ranges are manufacturer figures and reduce with payload, wind and temperature.
