GO KART · SKU AX-EV-964-OT

Porsche 964 Open-Top Electric Go-Kart

Classic open-top 964-style electric go-kart: 2500W brushless motor, 72V 50Ah lithium battery, up to 60 km/h and about 50 km range. Single-seat or double-seat.

MOTOR	BATTERY	TOP SPEED	SEATS
2500W brushless	**72V 50Ah lithium**	**60 km/h***	**Single or double**

The **Porsche 964 Open-Top Electric Go-Kart** brings the look of a classic open-top sports car to an electric go-kart you can buy online. It has round headlamps set into upright wings, wide rear arches and a low windscreen, and its open cockpit makes it easy to get in and out. Under the body is a modern electric platform: a **2500W brushless motor**, a **72V 50Ah lithium battery** and a **high-performance vector controller**.

It is the most photographed kart in our range, and the most approachable of our premium electric go-karts.

The multiple-unit price applies automatically in your cart once you reach the qualifying quantity. Shipping is calculated separately (see below).

Key features

Classic open-top styling. Round headlamps, wide rear arches and a low windscreen give it the look of a classic open sports car at kart scale.

2500W brushless drive. A brushless motor and vector controller on a 72V 50Ah lithium pack give smooth, strong acceleration up to a stated 60 km/h.

Single or double seat. Choose the integrated two-person bench seat or a single-seat layout before production.

Real chassis hardware. Steel frame, independent suspension with 32 mm shock absorbers, and disc brakes front and rear.

Charges in 3–4 hours. Plug in overnight or between sessions. The smart BMS protects against overcharge, over-current, short-circuit and over-temperature.

Made to your spec. Pick one of seven standard colours at no extra cost, or ask for custom paint, liveries, LED lighting or your logo.

Specifications

POWERTRAIN

Motor	2500W brushless motor
Battery	72V 50Ah lithium
Maximum speed	60 km/h (brochure)
Range	About 50 km stated; the brochure also lists "+20 km" (extended range, confirmed on order)
Charging time	3–4 hours
Controller	High-performance vector controller
